Form ADV Part 2: Firm Disclosure
Separately Managed Accounts

March 28, 2016

Item 1: Cover Page

This brochure provides information about the qualifications and business practices of Shelton Capital Management (“Shelton Capital” or the “Advisor”). If you have any questions about the contents of this brochure, please contact our Chief Compliance Officer, Teresa Axelson, at 800-955-9988 or taxelson@sheltoncap.com. The information in this brochure has not been approved or verified by the United States Securities Exchange Commission (SEC) or any state securities authority.

Additional information about Shelton Capital can be found on the SEC’s website at www.adviserinfo.sec.gov using the unique CRD search number 104720. You may request a copy of this brochure by contacting us at the 800 number or email address noted above.

Please keep in mind that nothing in this brochure is to be construed as an offer of securities and, where appropriate, you should refer to applicable product disclosure documents. Registration with the SEC does not imply a certain level of skill or training.

Item 2: Material Changes

There are no material changes to report pertaining to the management of separately managed accounts since the March 30, 2015 annual update.

Item 3: Table of Contents

Item 4 Advisory Business

Shelton Capital is a SEC-registered investment advisor organized as a limited partnership on August 1, 1985 under the laws of the State of California with its principal place of business located in Denver, Colorado. Shelton Capital is controlled by a privately held partnership, RFS Partners, LP which is controlled by RFS, Inc. (an S-Corporation). RFS, Inc. is controlled by a family trust. Mr. Stephen C. Rogers is the Chief Executive Officer of Shelton Capital and serves as a co-trustee of the family trust.

Shelton Capital offers its investment management expertise through separately managed account strategies ("SMAs"). The SMA strategies are primarily marketed through independent financial advisors for the benefit of their clientele. Advisors, acting in the capacity of a solicitor, can refer clients to Shelton Capital or, in other cases, a registered investment advisory firm may contract Shelton Capital to perform sub-advisory services for a portion of their advisory firm's client's account. In either case, Shelton Capital provides portfolio management services based upon the client's individual investment objectives, guidelines and restrictions on a discretionary basis.

Before establishing a client relationship, we will enter into a written client agreement with a client to understand their particular needs and investment goals and to establish guidelines appropriate to the client's account.

Shelton Capital cannot guarantee or assure a client –

1. that investment goals and objectives will be achieved,
2. of the future performance of an account or any specific level of performance;
3. of the success of any investment decision or strategy we may use; or
4. of the overall success of our management of a client's account.

The investment decisions we make are subject to various market, currency, economic, political and business risks and the risk that investment decisions will not always be profitable.

ERISA Accounts

Shelton Capital is deemed to be a fiduciary to clients that are employee benefit plans or individual retirement accounts (IRAs) pursuant to the Employee Retirement Income and Securities Act ("ERISA"), and regulations under the Internal Revenue Code of 1986 (the "Code"), respectively. As such, Shelton Capital is subject to specific duties and obligations under ERISA and the Internal Revenue Code that include among other things, restrictions concerning certain forms of compensation. To avoid engaging in prohibited transactions, Shelton Capital may only charge fees for investment advice.

Assets Under Management

As of March 10, 2016, Shelton Capital had $1,414,340,519 client assets under management all of which are managed on a discretionary basis.

Item 5 Fees and Compensation

The management fee paid to Shelton Capital for separately managed accounts is determined based on each client's individual needs and applicable portfolio restrictions and the distribution channel through which the account is established. The annual management fee is charged as a percentage of assets under management (discretionary and non-discretionary accounts) or a minimum fee arrangement and may be negotiable in the sole and absolute discretion of Shelton Capital.

The following table provides important information concerning the payment of the management fee and its calculation.

Prepayment of Fees	Management fees are normally paid quarterly in advance generally within fifteen (15) business days of the end of the quarter. The fees are deducted from your account.
Refund of Pre-Paid Fees	In the event an account closes prior to the end of a billing period, the pre-paid management fees will be pro-rated from the date of closing and credited back to the client.
Basis of Fee Calculation	Fee is based on net market value of an account as of the close of the market on the last day of the quarter.

New Account Establishment During a Quarter	Management fee is calculated based on the value of the assets and pro-rated for the number of days remaining in the quarter.
Additional Contributions to an Existing Account during a Quarter	Management fee is calculated based on the value of the assets as of the investment date and pro-rated for the number of days remaining in the quarter.
Withdrawal of Assets	Assets can be withdrawn generally upon five (5) business days written notice to the Advisor subject to the usual and customary securities settlement procedures.
Withdrawals or Deposits equal to or greater than $20,000 (cash and/or securities)	The management fee for the balance of the billing period will be pro-rated as of the date of the transaction to reflect the withdrawal or deposit and generally will be credited or due at quarter-end following the date of the withdrawal or deposit.
Withdrawals or Deposits less than $20,000 (cash and/or securities)	No fee adjustment will be made during the billing period of the transaction.

The following management fee schedules are based on the distribution channel establishing the SMA account using Shelton Capital's investment management services.

		Advisor (BD, RIA)	Solicitor	Retail Direct
Diversified ETF	Minimum Investment	$100,000	$100,000	$100,000
	Fees	75 bps -- $100K - $250K 60 bps --Every dollar greater than $250K $750 annual minimum per account	200 bps -- $100K - $250K 150 bps -- Every dollar greater than $250K $2,000 annual minimum per account	100 bps -- all dollar amounts $1,000 annual minimum per account
Single Stock Overwrite	Minimum Investment	$500,000	$500,000	$500,000
	Fees	60 bps -- All dollar amounts $3,000 annual minimum per account	150 bps -- All dollar amounts $750 annual minimum per account	100 bps -- All dollar amounts $5,000 annual minimum per account
Equity Income	Minimum Investment	$250,000	$250,000	$250,000
	Fees	60 bps -- All dollar amounts $1,500 annual minimum per account	200 bps -- $250K - $500K 150 bps -Every dollar greater than $500K $5,000 annual minimum per account	100 bps -- all dollar amounts $2,500 annual minimum per account
Fixed Income	Minimum Investment	$300,000	Not Applicable	$300,000
	Fees	30 bps – Less than $2,000,000 25 bps – Next $3,000,000 Negotiable – Over $5,000,000 $900 annual minimum per account	<u>Not Applicable</u>	60 bps – Less than $2,000,000 50 bps – Next $3,000,000 Negotiable – Over $5,000,000 $1,800 annual minimum per account

The above table reflects Shelton Capital's minimum requirements for assets under management for each SMA strategy and Shelton Capital may waive any minimum in its sole and absolute discretion. If the account size falls below the minimum requirement due to market fluctuations only, a client will not be required to invest additional funds with the Advisor to meet the minimum account size.

While it is not the Advisor's policy to accept new accounts at fees other than those shown above, varying workloads between clients may mean some variability of management fees. Management fees are otherwise negotiable in the sole and absolute discretion of the Advisor. Clients should keep in mind that lower fees for comparable services may be available from other sources.

Other Fees and Expenses
Client accounts may also be subject to other expenses such as custodial charges, brokerage fees, commissions, interest expenses, taxes, duties and other governmental charges. Item 12 further describes the factors that we consider in selecting or recommending broker-dealers for a client's transactions and determining the reasonableness of their compensation (ie: commissions).

Client assets may be invested in stocks, bonds, exchange-traded funds ("ETFs"), derivatives or other mutual funds. In these cases, the client will bear its *pro rata* share of the expenses and fees of the ETFs or mutual funds. These fees and expenses are described in the prospectus of each ETF or mutual fund.

Item 6 Performance-Based Fees and Side-by-Side Management
Shelton Capital does not charge a performance-based fee. In other words, we do not charge fees based on a share of the capital gains or the capital appreciation in your account(s).

Item 7 Types of Clients
Shelton Capital provides advisory services to the following types of clients:

- individuals (to include high net worth individuals)
- Pension and profit sharing plan trustees
- Pension and profit sharing plan participants
- Trusts, Estates or charitable organizations
- Nonprofit organizations and other non-governmental organizations
- Mutual funds

Sub-Advised Accounts
Shelton Capital may be appointed by other investment management firms to serve as a sub-advisor to one or more accounts managed by such firms. In return for sub-advisory services, the investment management firms pay Shelton Capital a sub-advisory fee which generally takes the form of a percentage of the investment management fee paid to the investment management firms by the sub-advised account. In some cases, Shelton Capital may deduct its fees from the client's account if it is the preference of the management firm and its client and allowed by the custodian.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Shelton Capital's Investment Strategies

	Investment Strategy
Fixed Income Strategies	Seek to deliver income and competitive returns by investing in client specified fixed income markets, including U.S. Treasuries, municipal bonds, corporate bonds and mortgage backed securities. Fixed income portfolios are actively managed to select securities that Shelton Capital believes will provide the best balance between risk and return specific to each client. For clients' seeking to maximize income exempt from federal taxes, an actively managed separate account of municipal securities issued by state and local governments can be created based on the specific risk and return of a client. Such municipal securities accounts can also consist of finance projects considered to be environmentally sustainable and/or focused on environmental solutions.
Equity Income Strategy	Seek to deliver capital appreciation and an enhanced level of income through the building of a concentrated portfolio of generally less than forty U.S. stocks and then writing covered calls and/or selling cash secured puts on these portfolio positions. This strategy is used to either reduce overall volatility or add incremental income. The covered calls are strategically sold to generate option premium or cash flow in addition to the portfolio's dividend yield. The cash-secured put involves selling put options and simultaneously setting aside enough cash or margin to buy the stock if an assignment occurs. We could also buy protective puts. A protective put is a risk-management strategy where a put or puts are purchased against a long stock or long portfolio position. The objective of buying puts is to reduce the directional risk and exposure of the individual stock or

portfolio while allowing for upside gains if the stock or portfolio continues to increase in value.

[Generate cash flow by writing covered call options on the underlying stock positions in a diversified equity portfolio which may also provide a means for income-oriented clients to diversify their distribution streams while reducing direct exposure to interest rate risk. Selling puts is an income generating, bullish strategy where the put seller receives a cash premium for the obligation to buy 100 shares of stock per each put sold at a set price. The premium income lowers the break-even stock price, if assigned, while providing cash flow to the seller.]

Single Stock Strategy	Seek to enhance cash flow and improve the risk-adjusted total return on a single stock position by employing the use of covered call writing secured put selling, or protective put buying. This strategy involves selling potential upside return on a stock for current income in the form of option premium. We may also sell out of the money (OMT) put options to enhance the income yields in accounts. The client may be using leverage to sell the secured puts, so there is risk of increased leverage in the portfolio. For each put option we sell in a client's account, the client is obligated to buy 100 shares at the options strike price. We may also buy a protective put. A protective put is a risk-management strategy where a put or puts are purchased against a long stock or long portfolio position. The objective of the strategy is to reduce the directional risk and exposure of the individual stock or portfolio while allowing for upside gains if the stock or portfolio continues to rally beyond the debit paid.
Diversified ETF Strategies	Provides a fully diversified portfolio of ETFs on which the manager writes (sells) covered calls on some or all of those positions to reduce overall volatility while adding incremental income. Offers the client three portfolios to choose from: 1. Conservative — Strategy is to provide stability of capital with moderate growth. With its anticipated low volatility, this approach carries relatively low risk, yet provides a moderate current income. 2. Balanced — Strategy is long-term capital growth, with a secondary focus on modest income through a mix of fixed-income and growth-oriented ETF's. Balanced portfolio clients are medium risk clients with a 5 to 10 year time horizon. 3. Growth — Strategy is long-term capital growth, although seeking lower volatility through diversification and the use of the covered call writing overlay. Clients will have a longer time horizon than the Balance portfolio.
Strategic Income Strategy	Seeks to deliver an enhanced level of cash flow through the selling of a concentrated portfolio of generally less than forth blue-chip cash-secured puts to enhance the level of cash flow. The cash-secured put involves selling put options and simultaneously setting aside enough cash or margin to buy the stock if an assignment occurs. We may also buy protective puts. A protective put is a risk-management strategy where puts are purchased against a long stock or long position. The objective of buying protective puts is to reduce the directional risk and exposure of a stock or portfolio while allowing for upside gains if the stock or portfolio increases in value.

Risks Associated with Specially Managed Accounts:

- There is no guarantee against loss or that all account objectives will be met.
- Covered call strategies limit upside potential for underlying security appreciation and will typically underperform in strong markets.
- Covered call strategies do not protect an underlying security from downside risk. The loss for the client could be the current price of the underlying security less the premium received for the call option.
- Put strategies used for hedging purposes carry the risk of losing the entire premium paid to purchase the option.
- Shares of underlying securities with an option strategy held in a margin account run the risk of being sold if the option(s) is exercised or the need arises to close a losing position.

- Withdrawals, such as systematic withdrawals as part of an income strategy, may result in a declining portfolio value over time.
- There are no assurances that we will be successful in reaching the investment objectives.
- The sale of the stock will produce tax consequences for U.S. taxpayers. Each option transaction also produces a tax consequence – when closed.
- An option writer may be assigned an exercise at any time during the period the option is exercisable.
- The writer of a covered call forgoes the opportunity to benefit from an increase in the value of the underlying interest above the option price, but continues to bear the risk of a decline in the value of the underlying interest.
- An option writer may be assigned an exercise that is made based on news that is published after the established exercise cut-off time and that the writer may not have an effective remedy to compensate for the violation of the option market's rules.
- In a strong market advance where the buyback involves an in the money (i.e., an option with a strike price less than the current level of the benchmark index) option, and volatility levels have declined, there may be a "debit" roll, whereby the cash needed to close out the option position exceeds the new sale's proceeds.
- In the fixed income strategy, we are limited to current market offerings, which may, at times, lead to significant delays in fully investing a portfolio. This is especially true when a client has very explicit criteria which is contrary to current market offering availability.

Methods of Analysis and Investment Strategies

Shelton Capital utilizes a variety of methods and strategies to make investment decisions and recommendations. The methods of analysis include fundamental research, charting analysis, cyclical analysis or technical analytical tools and approaches using various information sources. These methods, strategies and investments involve the potential risk of loss to clients and clients must be prepared to bear the loss of their entire contribution/investment.

Fixed Income Investments	Fixed income investments, including U.S. Treasuries, municipal bonds, corporate bonds and mortgage backed securities, are actively managed for total return. Individual securities are evaluated based on the credit risk, interest rate risk, duration risk, etc. of the specific security as well as their contribution to the risk/return profile of the portfolio. The portfolio management team focuses on integrating bond investing with sustainable, green investment principles.
Equity	Common Stocks, including potentially all U.S. publicly traded securities may be used depending on a client's stated investment objective. For client portfolios that use options, the potential economic impact of an option strategy on the equity holding is also taken into consideration.
ETFs	Shares of exchange traded funds may be purchased from time to time.

Analysis and Investment Strategies

Fixed Income Strategies	The fixed income investment strategies focus on maximizing income to the extent consistent with preservation of capital and the providing of competitive returns given the client's specified market (municipal, U.S. Treasury, corporate, etc.) and stated risk tolerance. In those cases, Shelton Capital, the client or another investment advisor may have responsibility for selection and purchase of all or a portion of the bonds in the client's portfolio. Shelton Capital may, under certain market conditions, seek to protect or hedge a client's portfolio against a decline in the value of its fixed income investments by holding cash or cash equivalents. Shelton Capital actively manages the fixed income SMA portfolios and may initiate transactions, as deemed necessary.
Equity Strategy	The investment strategy for equity accounts is to maximize total return on certain equity securities by writing covered options on these securities in order to create cash flow that may be disbursed to clients or reinvested in client accounts. Shelton Capital may provide option advisory services on a client's stock or ETF portfolio. In those cases, Shelton Capital, the client or another investment advisor would have responsibility for selection and purchase of all or a portion of the stocks in the client's portfolio. After the purchase of a stock,

Shelton Capital subsequently writes covered call options on the stock, and directs a broker to execute trades. The call options written for a client's account are considered "covered" because the account owns the stock against which the options are written. As a result, the number of covered call options that can be written against any particular stock is limited by the number of shares of that stock the client holds.

If the client's goal is to maximize option premiums generated, Shelton Capital generally writes as many covered call options as it can on the stocks the client owns. Shelton Capital also writes options of duration and exercise price that it believes should provide the client with the best expected outcome consistent with the client's overall objective. For some clients, the goal might be capital appreciation from the equities purchased in combination with cash flow from option premiums. In this case, Shelton Capital would write fewer covered call options on a portion of the portfolio, setting aside the remaining stocks on which options would not initially be written. The amount of covered call options written on the stocks held by a client are determined by Shelton Capital, in its sole discretion, based on the written client goals, investment opportunities presented by the overall financial position of each common stock within the stock market, market volatility, implied volatility and any other market factors which may give rise to advantageous conditions for the writing of covered call options.

Shelton Capital may, under certain market conditions, seek to protect or "hedge" a client's portfolio against a decline in the value of its stocks by purchasing put options. The purchase of a put option gives the right to sell or "put" a fixed number of shares of stock at a fixed price within a given time frame in exchange for the payment of a premium. The values of put options generally increase for the purchaser as stock prices decrease. The purchase of puts creates an additional expense, however, and may adversely affect the client's return.
Shelton Capital actively manages portfolios and may initiate transactions, as deemed necessary.

Shelton Capital may, upon a client's request, sell/write secured put options as a means to acquire underlying stocks at a price at or below the market price at the time the option was written. The put options written for a client's account are considered "secured' because the client's account has sufficient cash or margin designated to cover the obligation to "purchase" the amount of the underlying stock at the put's strike price. If the value of the underlying stock declines below the strike price of the put and the put is assigned, the client would be obligated to purchase the stock at a price in excess of its then current market value.

In the case where the client has not authorized the use of margin, if the client's withdrawals leave less than the amount necessary to cover the purchase of stock subject to the put and the put is assigned, then the account has a debit. If the client's account has a debit, then Shelton Capital is required to liquidate other account assets to cover the assignment. In the case where the client has authorized the use of margin, the client's account is subject to any additional margin requirements and related costs as stated in their margin agreement. Using margin increases risk to the account and requires a margin agreement.

Protective Puts Strategy

A protective put is a risk management strategy where a put or puts are purchased against a long stock or long portfolio position. The objective of the strategy is to reduce the directional risk and exposure of the individual stock or portfolio while allowing for upside gains if the stock or portfolio continues to rally beyond the debit paid.

With the protective put strategy, while the long put provides some temporary protection from a decline in the price of the corresponding stock, this does involve risking the entire cost of the put position. Should the long put position expire worthless, the entire cost of the put position would be lost.

Cash-Secured Puts Strategy

The cash-secured put involves writing an at-the-money or out-of-the-money put option and simultaneously setting aside enough cash to buy the stock. This is an income generating, bullish strategy where the put seller receives cash premium for the obligation to buy 100 shares of stock per each put sold at a set price. The premium income lowers the break-even stock price, if assigned, while cash flow to the seller.

Selling naked or cash-secured puts may not be appropriate for all investors and includes a risk of purchasing the underlying stock at the option strike price regardless of the prevailing market price, which may be significantly lower.

Material Risks

All investment strategies we offer involve risk and may result in loss of your original investment. Many of these risks apply to stocks, bonds, derivatives and any other investment or security. The following material risks may apply to some or all of our investment strategies.

Risk	Explanation
Stock Market Risk	Market risk involves the possibility that an investment's current market value will fall because of a general market decline, reducing the value of the investment regardless of the operational success of the issuer's operations or its financial condition.
Investment Strategy Risk	Shelton Capital's strategy may fail to produce the intended results.
Style Risk	Some of our strategies may invest in either "value" investments, "growth" investments, or both. With respect to securities and investments we consider undervalued, market prices may not reflect our determination that the security is undervalued, and its price may not increase to what we believe to be its full value. It may even decrease in value. With respect to "growth" investments, the underlying earnings or operational growth we anticipate may not occur, or the market price of the security may not increase as we expect it to.
Defensive Risk	To the extent the strategy attempts to hedge its portfolio of stocks or takes defensive measures such as holding a significant portion of its assets in cash or cash equivalents, the objective may not be achieved.
Legal or Legislative Risk	Legislative changes or Court rulings may impact the value of investments, or the securities' claim on the issuer's assets and finances.
Inflation	Inflation may erode the buying power of your investment portfolio.
Interest Rate Risk	The chance that bond prices over all will decline over short and long-term periods due to rising interest rates. Many factors can cause interest rates to rise. Some examples include central bank monetary policy, rising inflation rates and general economic conditions.
State-Specific Risk	Investing in a specific state introduces exposure to economic and political developments in that state which can have a negative impact on the issuers. A lack of geographic diversification of a multi-state portfolio exposes an investment to regional economic downturns.
Lack of Diversification	Certain client accounts may not be diversified among a wide range of security types, countries or industry sectors. Accordingly, client portfolios are subject to more rapid change in value than would be the case if a wider diversification strategy was maintained among the various types of securities and other instruments.
Income Risk	The chance that declining interest rates will reduce the amount of income paid.
Call Risk	The chance that during declining interest rates, a bond issuer will call or prepay a high-yielding bond before the bond's maturity date. This would force the purchasing of lower yielding bonds which would reduce the income generated and could potentially result in capital gains.
Credit Risk	The issuer of a debt security or a guarantor of a security held or counterparty to a transaction may default on its payment obligations or experience a decline in credit quality. Generally,

the lower the credit rating of a security, issuer, guarantor or counterparty, the higher the degree of risk as to the payment of interest and return of principal. Also, a downgrade in the credit quality of a security or its issuer, or guarantor may cause the security to decline in value and could affect the security's liquidity and make it more difficult to sell.

Liquidity	An inherent risk with any investment is that of liquidity. Liquidity is the risk of not being able to quickly dispose of a security due to its lack of marketability.
Leverage	Performance may be more volatile if a client's account employs leverage.
Hedging	There can be no assurances that a particular hedge strategy is appropriate. A hedge strategy does not guarantee protection against the calling of a stock. While we may enter into hedging transactions to seek to reduce risk, such transactions may result in poorer overall performance and increased risk.

Material Risks Associated with Options

There is no guarantee against loss or that all account objectives will be met. The downside risk of the potential loss in the value of the underlying equities in a declining market will be mitigated only to the extent of net option premiums received in the account and by any puts purchased for the account. At times, Shelton Capital may repurchase a written option and sell a replacement option at a higher strike price and/or further out in time. This may be done at times to reduce the risk of loss in an equity position during fluctuating markets and/or to maintain the overall investment style of the portfolio. This strategy may reduce the amount of cash flow available for distribution to the client.

The following factors, among others, can affect account performance with respect to investing and trading in options: market, sector, and stock-specific volatility, length of time invested, diversification, management and other account fees and charges, taxes, liquidity in options and equity markets, inflation and deflation, and various other economic and political factors. Early assignment of option contracts can also occur, and this may detract from dividends paid by the companies whose stocks are held in the account. The more money disbursed from the account over time, the less will be available for possible reinvestment and growth, which may affect performance, especially in a declining market.

Clients with secured puts written in their accounts give up upside potential of the stock above the option price for the option period and bears the risk that the value of the stock declines below the break-even point (strike price minus the premium received), and the loss could be substantial if the decline is significant. Such Clients also bear the risk of a decline in the value of the underlying cash collateral (if the cash is invested in a short-term debt instrument such as a treasury bill or note). For this assumption of risk, Clients holding secured puts earn cash premiums from selling the secured put and potential interest from a treasury bill or money market fund during the option period. Because the Client does not yet own the stock, he/she is not entitled to any dividends paid on the stock during the option period.

There are other risks of covered calls and secured puts that are more fully explained in the OCC Risk Booklet "Characteristics and Risks of Standardized Options" and the newly issued Supplement. Such risks include, but not limited to, tax implications of covered writing, option market liquidity, and market volatility. Clients should be sure to read and ask any questions raised after reading the OCC Risk Booklet, the Supplement and the management agreements they received to understand the possible costs and risks as well as potential opportunities for an investment in one of these styles.

Item 9 Disciplinary Information

Our firm, management and investment advisory representatives have no reportable disciplinary events to disclose.

Item 10 Other Financial Industry Activities and Affiliations

Broker-Dealer Registration Status

RFS Partners is the general partner of Shelton Capital and is registered with the SEC and a member of FINRA. RFS Partners serves as the distributor for the Shelton Funds and the Shelton Greater China Fund. RFS Partners maintains a limited registration and does not place or clear trades for any advisory clients. Some of Shelton Capital's officers and employees are registered with RFS Partners as registered representatives and serve as officers of RFS Partners.

Investment Companies

Shelton Capital serves as investment advisor to the Shelton Funds and the Shelton Greater China Fund. Some of our officers also serve as officers to the mutual funds and one of our officers serves as an interested trustee of the mutual funds.

Affiliated Advisor
Shelton Capital is the general partner of ETSpreads, LLC a SEC registered investment advisor. ETSpreads is also registered as a commodity pool operator with the NFA for a series of exchange traded funds registered under the 1940 Act as mutual funds. Some of Shelton Capital's officers are also officers of ETSpreads and registered with the NFA.

Sub-Advisors
Shelton Capital has an arrangement with Green Alpha Advisors to manage the assets of the Shelton Green Alpha Fund. For additional information on Green Alpha Advisors' practices you may obtain their Form ADV Part 2 at www.greenalphaadvisors.com.

Other Affiliations
Shelton Capital may from time to time enter into arrangements with independent third party marketing firms to assist in establishing relationships with advisory platforms, disseminate information to licensed financial professionals and institutions, increase Shelton Capital's exposure to wire house advisors, and assist the advisory platforms in understanding the SMA advisory services offered by Shelton Capital. Under such arrangements, the independent third party marketing firms are not employees of Shelton Capital, do not act in the capacity of a solicitor, pay their own expenses, and have no authority to bind Shelton Capital.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics
Shelton Capital is committed to upholding the highest standards of business ethics and conduct. We are proud of this commitment and consider it fundamental to earning and maintaining the trust of our clients and prospective clients.

Shelton Capital operates under a Code of Ethics (the "Code") that complies with Rule 204A-1 of the Investment Advisers Act of 1940, as amended and Section 17(j) of the Investment Company Act of 1940, as amended and Rule 17j-1 thereunder. Our Code obligates Shelton Capital and its related persons to put the interests of our clients before their own interests and to act honestly and fairly in all respects in their dealings with clients. Shelton Capital's personnel are also required to comply with applicable federal securities laws.

The Code also incorporates Shelton Capital's personal trading policy. The personal trading policy is guided by the principle that as a fiduciary entrusted with the management of client assets our foremost concern is and must always be to protect the interests of our clients. The personal trading policy establishes a framework for managing personal trading by officers and employees that protects the interest of our clients, while permitting responsible investing by our officers and employees. The Code includes a standard of business conduct which includes but is not limited to:

1. Requiring acknowledgement and agreement to observe the requirements of the Code;
2. Prohibiting personnel from buying or selling securities for their own individual accounts if such purchase or sale represents $50,000 or 1,000 shares, whichever is greater, and if the securities at the time of such purchase or sale:
    i. are being considered for purchase or sale by the mutual funds (except the index funds)
    ii. have been purchased or sold by a mutual fund within the most recent seven (7) days if such person participated in the recommendation to, or the decision by, a fund to purchase or sell such security (except the index funds);
3. Requiring personnel, subject to the Code, to report personal holdings to Shelton Capital at time of employment and on both an annual and a quarterly basis;
4. Requiring the reporting of violations of the Code to the Chief Compliance Officer.

Shelton Capital has adopted a gifts and entertainment policy to minimize and manage potential conflicts of interest in connection with our employees receiving gifts and entertainment in connection with their professional duties. Our compliance department monitors and enforces our Code and the gifts and entertainment policy. Clients or prospective clients may obtain a copy of the Code by contacting Shelton Capital by telephone at (800) 955-9988 or by email at info@sheltoncap.com. Please refer to the section entitled "other Financial Industry Activities and Affiliations" for a discussion of Shelton Capital's affiliations and related persons.

Client Transactions in Securities where Advisor has a Material Financial Interest
Shelton Capital serves as the investment advisor of mutual funds and receives an advisory fee for its services.

Item 12 Brokerage Practices

Factors Considered in Selecting or Recommending Broker-Dealers for Client Transactions

Shelton Capital generally has discretion over the selection and amount of securities to buy or sell for a client without obtaining specific client consent to a transaction. We also generally have discretion to select the broker, dealer or other counterparty to effect a particular transaction and, where negotiable, the commission rates a client pays with the exception of an equity focused SMA. To help manage the selection of counterparties and individual transactions, we have adopted a Trade Management Policy. This policy governs our trading activities for our clients and helps us address potential conflicts of interest raised by brokerage practices.

We recognize that brokerage commissions are paid with client assets. We manage these assets consistent with applicable law and our duty to seek best execution, and we seek to maximize the value of these assets wherever possible.

Best execution involves both quantitative and qualitative aspects and best execution does not always mean the lowest available commission rates for a transaction. From a quantitative perspective, best execution involves seeking the best available price and lowest transaction costs so that a client's total cost or proceeds are the most favorable under the circumstances. Cost includes transaction fees and expenses as well as other less quantifiable costs such as market impact, opportunity cost and market effects. These other costs although harder to quantify, can significantly impact the total cost of a transaction.

Best execution involves considering a number of factors, including some or all of the following: actual experience with the counterparty, the reputation of the counterparty, the counterparty's financial strength and stability, efficiency of execution, promptness of execution, ability and willingness to maintain confidentiality and anonymity, frequency and manner of error resolution, special execution capabilities, block trading and block positioning capabilities, expertise, commission rates and dealer spreads, technological capabilities and infrastructure, including back office processing capabilities, willingness of the counterparty to commit capital, clearance and settlement efficiency, and the ability and willingness to accommodate any special needs (for example, step-outs).

In selecting a counterparty for any transaction or series of transactions, we do not adhere to any rigid formula. Rather, we weight a combination of factors, like those listed above, depending on the circumstances. Relevant factors will vary for each transaction. While we generally seek reasonably competitive commission rates, we do not necessarily pay the lowest spread or commission available. In our experience, the lowest commission rate or the most expeditious execution does not necessarily correlate to the best trade for a client.

Batching of Orders

Transactions for SMA clients generally will be effected independently from other accounts managed by Shelton Capital, unless we decide to purchase or sell the same securities for several of our SMA clients. Shelton Capital may (but is not obligated to) combine or "batch" such orders to obtain best execution, to negotiate more favorable commission rates or to allocate equitably among SMA clients differences in prices and commissions or other transaction costs that might have been obtained had such orders been placed independently.

Under this procedure, transactions will be averaged as to price and transaction costs and typically will be allocated among SMA clients in proportion to the purchase and sale orders placed for each SMA client account on any given day. If we cannot obtain execution of all the combined orders at prices or for transaction costs that Shelton Capital believes are desirable, we will allocate the securities bought or sold as part of the combined orders by following our Trade Management Policy.

A broker may provide research services to the Advisor in exchange for Advisor's use of that broker for client transactions and services. Such research generally will be used to service all of the Advisor's SMA clients. Brokerage commissions paid by an individual SMA client may be used to pay for research that is not used in managing that SMA client's account. The Advisor may, in its discretion, cause the account to pay the broker a commission greater than another qualified broker might charge to effect the same transaction where the Advisor determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services received. As a result, an SMA client may pay higher commissions or other transaction costs or greater spreads, or receive less favorable net prices, on transactions for the account than would otherwise be the case if the Advisor used other or multiple brokers.

The Advisor will arrange for the execution of securities transactions through broker-dealers, selected by the Advisor, and at such prices and commissions that, in the Advisor's good faith judgment, will be in the best interest of the account. If an SMA client designates its own broker, that SMA client may not receive best execution by effecting transactions through the specified broker. The Advisor will not negotiate brokerage commissions with client designated brokers, and as a result, the SMA client may pay higher commissions or other transaction costs, greater spreads, or receive less favorable net prices.

The Advisor may receive some benefits from broker-dealers selected by clients as custodian. There is no direct link between benefits that may be received from the custodian and the investment advice we give to our clients. However, we may receive economic benefits from such broker-dealers that are typically not available to such broker-dealers' retail investors. These benefits may include the following products and services (provided without cost or at a discount): duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Advisor participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have advisory fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; and discounts on compliance, marketing, research, technology, and practice management products or services provided to the Advisor by third party vendors. Some of the products and services made available by broker-dealers may benefit the Advisor but may not benefit our clients. These products or services may assist us in managing and administering client accounts.

Clients' broker-dealers do not depend on the amount of brokerage transactions directed to the broker-dealer. Clients should be aware, however, that the receipt of economic benefits by the Advisor or our related persons in and of itself creates a potential conflict of interest and may indirectly influence our recommendation of a broker-dealer for custody and brokerage services.

<u>Directed Brokerage</u>

In some instances, because of a prior relationship between a client and one or more brokers, or for other reasons, a client may instruct Shelton Capital to execute some or all securities transactions for its account with or through one or more brokers designated by the client. When a client directs Shelton Capital to use a specified broker-dealer to execute all or a portion of the client's securities transactions, Shelton Capital treats the client direction as a decision by the client to retain, to the extent of the direction, the discretion Shelton Capital would otherwise have in selecting broker-dealers to effect transactions and in negotiating commissions for the client's account. Although Shelton Capital attempts to effect such transactions in a manner consistent with its policy of seeking best execution, there may be occasions where it is unable to do so, in which case we will continue to comply with the client's instructions.

Transactions in the same security for accounts that have directed the use of the same broker will be aggregated. When the directed broker-dealer is unable to execute a trade, we will select broker-dealers other than the directed broker-dealer to effect client securities transactions. A client who directs us to use a particular broker-dealer to effect transactions should consider whether such direction may result in certain costs or disadvantages to the client. Such costs may include higher brokerage commissions (because Shelton Capital may not be able to aggregate orders to reduce transaction costs), less favorable execution of transactions, and the potential of exclusion from the client's portfolio of certain foreign ordinary shares and/or small capitalization or illiquid securities due to the inability of the particular broker-dealer in question to provide adequate price and execution of all types of securities transactions.

By permitting a client to direct Shelton Capital to execute the client's trades through a specified broker-dealer, Shelton Capital will make no attempt to negotiate commissions on behalf of the client and, as a result, in some transactions the clients may pay materially disparate commissions depending on their commission arrangement with the specified broker-dealer and upon other factors such as number of shares, round and odd lots and the market for the security. The commissions charged to clients that direct us to execute the client's trades through a specified broker-dealer may in some transactions be materially different that those of clients who do not direct the execution of their trades. Client's that direct us to execute the client's trades through a specified broker-dealer may also lose the ability to negotiate volume commission discounts on batched transactions that may otherwise be available to other clients.

<u>Brokerage for Client Referrals</u>

Each client of Shelton Capital may make cash payments to third-party solicitors for client referrals, provided that, to the extent required, each such solicitor has entered into a written agreement with the Advisor pursuant to which the solicitor will provide each prospective client with a copy of the Advisor's Form ADV Part 2, and a disclosure document setting forth the terms of the solicitation arrangement, including the nature of the relationship between the solicitor and Advisor and any fees to be paid to the solicitor. Where applicable, cash payments for client solicitations will be structured to comply fully with (i) the requirements of Rule 206(4)-3 under the Investment Advisers Act of 1940, as amended, and related SEC staff interpretations or with the laws of the relevant state(s).

Item 13 Review of Accounts

Each client's account is generally reviewed by the Portfolio Manager or his/her designee at least quarterly to determine whether securities positions should be maintained in view of current market conditions. Account reviews focus on each account's strategy and evaluate all securities using fundamental, technical and quantitative analysis. Significant market events affecting the prices of one or more securities in a client's account, changes in the investment objectives or guidelines of a particular client, or specific arrangements with particular clients may trigger reviews of a client's account on other than a periodic basis. Each client receives a quarterly statement and trade confirmation from the client's broker-dealer.

Item 14 Client Referrals and Other Compensation

Shelton Capital may pay referral fees to independent advisors or advisory firms ("solicitors") for introducing clients to us. Whenever we pay a referral fee, we require the solicitor to provide the prospective client with a copy of Part2 of Shelton Capital's ADV and a separate disclosure statement that includes the solicitor's name and relationship with the firm, the fact that the solicitor is being paid a referral fee and the amount of the fee. Additionally, Shelton Capital may pay a contractually agreed upon fee to third party marketing firms to assist in establishing relationships with advisory platforms and other financial professionals and institutions in an effort to expand Shelton Capital's SMA advisory services exposure.

Item 15 Custody

Shelton Capital does not maintain possession or custody of the funds or securities of any client. Clients are required to appoint custodians who are responsible for the safe custody of investments and money, settling transactions and registering investments. With client consent, Shelton Capital may cause fees to be paid out of separately managed accounts by the clients' custodian. To the extent Shelton Capital is deemed to have custody of client assets, we will comply with the relevant requirements imposed on investment advisers that have custody of client assets pursuant to Rule 206(4)-2 under the Investment Advisers Act of 1940, as amended.

As part of Shelton Capital's billing process, the client's custodian is provided an invoice stating the amount of the management fee to be deducted from each client's account. On at least a quarterly basis, the custodian is required to send to the client a statement showing all transactions within the account during the reporting period.

Because the custodian does not calculate the amount of the management fee to be deducted, it is important for clients to carefully review their custodial statements to verify the accuracy of the calculation, among other things. Clients should contact Shelton Capital directly if they believe that there may be an error in their account statements.

Item 16 Investment Discretion

Shelton Capital receives discretionary authority from a client at the outset of an advisory relationship. In all cases however, such discretion is exercised in a manner consistent with the stated investment guidelines established by the client.

Unless otherwise instructed or directed by a discretionary client, Shelton Capital has the authority to determine--

1. the securities to be purchased and sold for the client account (subject to restrictions on its activities set forth in the applicable investment management agreement and any written investment guidelines)
2. the amount of securities to be purchased or sold for the client account
3. Because of the differences in client investment objectives and strategies, risk tolerances, tax status and other criteria, there may be differences among clients in invested positions and securities held. Shelton Capital submits an allocation statement to the trading desk describing the allocation of securities to (or from) client accounts for each trade/order submitted. Shelton Capital may consider the following factors, among others, in allocating securities among clients:
    a. Client investment objectives and strategies;
    b. Client risk profiles;
    c. tax status and restrictions placed on a client's portfolio by the client or by applicable law;
    d. size of the Client account;
    e. nature and liquidity of the security to be allocated;
    f. size of available position;
    g. current market conditions; and
    h. account liquidity, account requirements for liquidity and timing of cash flows.

Although it is our policy to allocate securities to eligible client accounts on a *pro rata* basis (based on the value of the assets of each participating account relative to value of the assets of all participating accounts), these factors may lead us to allocate securities to client accounts in varying amounts. Even client accounts that are typically managed on a *pari passu* basis may from time to time receive differing allocations of securities based on total assets of each account eligible to invest in the particular investment type (*e.g.*, equities) divided by the total assets of all accounts eligible to invest in the particular investment.

Securities acquired by Shelton Capital for its clients through a limited offering will be allocated pursuant to the procedures set forth in our allocation policy. The policy provides that we will determine the proposed allocation of limited offering securities after considering the factors described above with respect to general allocations of securities and determining those client accounts eligible to hold such securities. Eligibility will be based on the legal status of the clients and the client's investment objectives and strategies

If it appears that a trade error has occurred, Shelton Capital will review the relevant facts and circumstances to determine an appropriate course of action. To the extent that trade errors and breaches of investment guidelines and restrictions occur, our error correction procedure is to ensure that clients are treated fairly and, following error correction, are in the same position they would have been if the error had not occurred. We maintain discretion to resolve a particular error in any appropriate manner that is consistent with the above stated policy.

Item 17 Voting Client Securities

With the exception of certain sub-advised accounts, Shelton Capital does not vote proxies on behalf of its SMA clients. Therefore, proxy materials may be sent directly to such clients for their consideration. To the extent we accept proxy voting authority on behalf of our SMA clients, we comply with our proxy voting policies and procedures that are reasonably designed to ensure that in cases where we vote proxies with respect to client securities, such proxies are voted in the best interests of our clients. Clients may obtain a copy of our proxy voting policies and procedures and voting information by contacting Shelton Capital at (800) 955-9988 or by email at info@sheltoncap.com.

Item 18 Financial Information

Shelton Capital has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.

Privacy Statement

When you become a client of Shelton Capital, you entrust us not only with your hard-earned assets but also with your non-public personal and financial information ("client information"). We consider your client information to be private and confidential, and we hold ourselves to the highest standards of trust and fiduciary duty in their safekeeping and use.

Our Privacy Principles:

- We do not sell client information
- We do not provide client information to persons or organizations outside Shelton Capital who are doing business on our behalf (e.g., non-affiliated third parties) for their own marketing purposes
- We afford prospective and former clients the same protections as existing clients with respect to the use of client information.

Information We May Collect:

We collect and use information we believe is necessary to administer our business, to advise you about our products and services, and to provide you with customer service. We may collect and maintain several types of client information needed for these purposes, such as:

- From you, (application and enrollment forms, transfer forms, distribution forms, checks, correspondence, or conversation), such as your address, telephone number and social security number
- From your transactions with your custodian, such as your transaction history and account balance
- From electronic sources, such as our website or e-mails

How We Use Information About You:

Shelton Capital will only use information about you and your accounts to help us better serve your investment needs or to suggest Shelton Capital services or educational materials that may be of interest to you.

Use of E-Mail Address:
If you have requested information regarding Shelton Capital products and services and supplied your e-mail address to us, we may occasionally send you follow-up communications or information on additional products or services.

We also include instructions and links for unsubscribing from Shelton Capital e-mails. We do not sell e-mail addresses to anyone, although we may disclose e-mail addresses to third parties that perform administrative or marketing services for us. We may track receipt of e-mails to gauge the effectiveness of our communications.

Information Disclosure:
We do not disclose any nonpublic personal information about our clients or former clients to non-affiliated third parties without the client's authorization. However, we may disclose client information to persons or organizations inside or outside our firm to process your requests or authorized transactions. We may provide client account information to governmental agencies or other entities as required by court order or law.

How We Protect Your Information:
We restrict access to your client information to authorized persons who have a need for these records in order to provide products or services to you. We also maintain physical, electronic, and procedural safeguards to guard client information.

For clients with internet access, Shelton Capital recommends that you do not provide your user name or password to any one for any reason.

In the event you hold your account through a financial intermediary, the privacy policy of that financial intermediary will govern how your private information will be shared with non-affiliated third parties.

Form ADV Part 2: Supplement
March 28, 2016

Barringer H. Martin, CFA, Portfolio Manager
455 Market Street, #1600
San Francisco, CA 94105
415-398-2727 Facsimile: 415-421-2019

Introduction and Overview (Item 1)

This Brochure Supplement provides information about Barringer H. Martin that supplements Shelton Capital Management's ADV Brochure. You should have received a copy of that Brochure.

Please contact Teresa Axelson, taxelson@sheltoncap.com, if you did not receive a copy of Shelton Capital Management's ADV Brochure or if you have any questions about the contents of this supplement.

Education, Background and Business Experience (Item 2)

Mr. Martin is the lead Portfolio Manager for the Optima Separately Managed Accounts utilizing covered call writing strategies. He joined the firm in March of 2008 after serving as Vice President, Senior Portfolio Manager, for Kelmoore Investment Company where he developed the investment management program utilizing covered call writing strategies utilized today by Shelton Capital Management.

Mr. Martin earned his Bachelor's degree in Finance at the University of Arizona in 1998. Mr. Martin earned the right to use the Chartered Financial Analyst (CFA) designation in September 2009 and is a member of the San Francisco Society of Financial Analysts.

Mr. Martin holds the Series 4 (Registered Options Principal) Series 66 (Uniform Combined State Law) and the Series 63 (Uniform Securities Agent) licenses.

Designation

Chartered Financial Analyst: 2009

The CFA charter is a qualification for finance and investment professionals, particularly in the fields of investment management and financial analysis of stocks, bonds and their derivative assets. The program focuses on portfolio management and financial analysis, and provides a general knowledge of other areas of finance and economics.

To become a charter holder a candidate must satisfy the following requirements: (i) have four years of qualified work experience (or a combination of education and work experience acceptable by the CFA Institute). Individual level exams may be written prior to satisfying this requirement; (ii) complete the CFA Program (mastery of the current CFA curriculum and passing three six-hour examinations; (iii) become a member of the CFA Institute and apply for membership to a local CFA member society; and (iv) adhere to the *CFA Institute Code of Ethics and Standards of Professional Conduct*. The three exams cover ethics, quantitative methods, economics, corporate finance, financial reporting and analysis, security analysis and portfolio management.
